DEPARTMENT OF THE AIR FORCE
FY 1998/1999 BIENNIAL BUDGET ESTIMATES
OPERATION AND MAINTENANCE, AIR NATIONAL GUARD

CONGRESSIONAL REPORTING REQUIREMENT

The following information is submitted in accordance with Section 413 of the FY 1997 National Defense Act reflecting end strength requested for FY 1998 and FY 1999:

	<u>FY 1998</u>	<u>FY 1999</u>
a. Number of dual-status technicians in high priority units and organizations	22,574	22,390
b. Number of technicians other than dual-status in high priority units and organizations	394	342
c. Number of dual-status technicians in other than high priority units and organizations	0	0
d. Number of technicians other than dual-status in other than high priority units and organizations	0	0

The FY 1998 and FY 1999 military technician levels are below the technician floor established in the FY 1997 National Defense Authorization Act. The Department is conducting the Quadrennial Defense Review (QDR), which is assessing military strategy, force structure, readiness, modernization, and infrastructure. A report will be issued later this year outlining the force mix and manning requirements needed to support the Reserve and Guard mission requirements to include military technicians. In addition, the Army Reserve is finalizing its restructure in accordance with the "Off-Site" agreement which could affect the number of military technicians.

Program Budget Decision Unit: 066 Air National Guard

I. Description of Operations Financed

For Operation and Maintenance (O&M) of the Air National Guard (ANG), including the maintenance, operation, repair and other necessary expenses of facilities for the training and administration of the Air National Guard. Includes repair of facilities; maintenance and operation of aircraft; transportation of things; hire of passenger motor vehicles; purchase and rental of data processing equipment; and services, supplies, materials, and equipment as authorized by law for the Air National Guard. Expenses incident to the maintenance and use of supplies, materials, and equipment, including such as may be furnished from stocks under the control of agencies of the Department of Defense; travel expenses (other than mileage) on the same basis as authorized by law for Air National Guard personnel on active Federal duty, for Air National Guard commanders while inspecting units in compliance with National Guard regulations when specifically authorized by the Chief, National Guard Bureau are also included.

The \$2,991.2 million budget request for FY 1998 includes price growth of \$218.0 million and a program increase of \$59.9 million or 2.0%. However, included in this increased growth are a functional transfer from the active Air Force equalling \$5.3 million and a shortfall in FY 1997 funds of \$28.3 million to support the flying hour program. After adjusting for these changes, the Air National Guard's real growth between FY 1997 and FY 1998 is .9%. The FY 1998 budget request supports 87 flying units, 361,921 flying hours, and 24,659 civilian end strength. This represents a reduction of 13,463 flying hours and 390 civilian end strength below FY 1997 requirements. FY 1998 increases in flying operations include the growth of four (4) B-1B aircraft at the second ANG bomber unit, additional aircraft and engine maintenance requirements for KC-135, B-1, C-5 and F-16 aircraft, plus logistics equipment and support items for the quick response tactical reconnaissance capability into five (5) F-16 tactical fighter units. Additional increases support the DoD initiative to regionalize and modernize the Defense Civilian Personnel Data System, medical resources required to provide Hepatitis A vaccine and to support the implementation of the Clinical Lab Improvement Act, and increased advertising funding which will allow the ANG to fill critical skills positions and attain authorized strength levels. FY 1998 decreases are attributed to the reduction of four (4) C-130 aircraft each at five (5) locations, the loss of C-26 and T-43 operational support aircraft, and technician manpower decreases at KC-135 and A-10 units. Other decreases are due to the downsizing of civil engineering units, the full year impact of the loss of three (3) Tactical Air Control units, personnel reductions for the ANG Readiness Center and space surveillance operation and the deferral of Level II Environmental compliance projects.

The FY 1998 budget request finances the following activities:

Flying Units	87
Military Technicians and Other Civilians	24,659
Flying Hours	361,921
Primary Assigned Aircraft (PAA)	1,157

Program Budget Decision Unit: 066 Air National Guard

I. Description of Operations Financed

The FY 1999 budget request of \$2,981.8 million includes price growth of \$-27.4 million and a program increase of \$18.0 million or .6%. Included in the FY 1999 program reduction is an increase of \$2.8 million for the functional transfer of training range responsibilities from the active Air Force. Once this change is considered, the Air National Guard real growth between FY 1998 and FY 1999 becomes .5%. The FY 1999 budget request provides resources for 87 flying units, 358,539 flying hours, and 24,346 civilian end strength. This represents a reduction of 3,382 flying hours and 313 civilian end strength from the FY 1998 budget request. FY 1999 flying operations changes include an increase for aircraft and engine maintenance at the depots and real property maintenance funding to support preservation maintenance levels that are partially offset by reductions caused by the elimination of the Pacer Coin mission, and a decrease in B-1 bomber requirements. Other reductions in FY 1999 are related to the one-time add in FY 1998 for the Defense Civilian Personnel Data System, base closure impact on base operation support funding, plus additional manpower losses for civil engineering, Tactical Air Control, space surveillance, and the Air National Guard Readiness Center.

The FY 1999 budget request finances the following activities:

Flying Units	87
Military Technicians and Other Civilians	24,346
Flying Hours	358,539
Primary Assigned Aircraft (PAA)	1,157

8. Program Increases	\$ + 132,454
a. Operating Forces budget activity increases in FY 1998 are attributed to depot maintenance requirements for KC-135, B-1, C-5, and F-16 aircraft, and the growth of four (4) PAA at the second ANG B-1 bomber location. Additional increases in FY 1998 support DoD's modernization initiative for the Defense Civilian Personnel Data System, medical funding for the implementation of the Clinical Lab Improvement Act, mandatory medical testing, and Hepatitis A vaccine, and the Air Force directed Theater Battle Management functional system at seventy two (72) Air National	
b. Administration and Servicewide Activities budget activity reflects the partial increase in historically underfunded recruiting and advertising resources that will enhance the ANG's ability to fill critical skills vacancies, replace retiring members, and to meet strength objectives, thus insuring Total Force readiness levels.

\$ - 77,819

- a. Reductions in Operating Forces budget activity include the loss of four (4) C-130 aircraft each at five (5) locations, the full year impact of the reduction in C-26 aircraft, plus additional decreases in C-26 and T-43 aircraft during FY 1998, and civilian manpower losses for KC-135 and A-10 units. Additional reductions in FY 1998 are attributed to the downsizing of Air National Guard civil engineering units, the annualization of the deactivation of three (3) Tactical Air Control units, the deferral of Level II environmental projects, real property maintenance decrease due to workload being accomplished in FY 1997, and reduced civilian end strength levels for the ANG Readiness Center and space surveillance. \$ - 77,737

14. Program Decreases

\$ - 51,688

- a. FY 1999 decrease in Operating Forces activity is based on the elimination of the Pacer Coin mission, the reduction of leased space requirements for the second B-1 bomber unit, and the technician end strength decrease at ANG KC-135 units. Other reductions during the fiscal year are due to the continued loss of civil engineering manpower related to the downsizing of units, the deactivation of two (2) Tactical Air Control units, the full year impact of the conversion of technician personnel to Active Guard/Reserve (AGR) for the space surveillance operation, and directed civilian end strength reductions at the ANG Readiness Center. Base communications funding is reduced because of the one-time FY 1998 requirement to support the modernization of the Defense Civilian Personnel Data System, and base operation support requirements decrease based on base closure decisions impacting Griffiss AFB, New York.

BUDGET ACTIVITY: OPERATING FORCES

EXHIBIT OP-5

Activity Group: Air Operations

I. Description of Operations Financed:

This activity includes fuels for flying of Air National Guard mission related aircraft as well as fuels for mission support operations. Also included is the federal portion of Operation and Maintenance expenses for non-Federally owned Air National Guard facilities of which the total cost is shared by the states. Additionally, the operating forces budget activity provides for civilian personnel, including military technicians who carry on the day-to-day training, maintenance, and administration of the Air National Guard; transportation cost for training conducted at deployed locations; per diem, communications; miscellaneous services and equipment; and medical support and supplies. These are required to provide the facilities, equipment, and day-to-day staffing needed to train, equip, and support an Air National Guard force at a level of combat readiness that enables it to immediately assimilate into the active force and be capable of conducting independent operations in accordance with unit wartime taskings. This estimate provides funds for direct expenses of aviation fuel for the operation of Air National Guard mission related aircraft; fuel for jet engine test cell operation, operation of aircraft ground support equipment; power equipment for communications units; and expenses incident to the base operations and maintenance of non-Federally owned Air National Guard installations that have training support as a primary mission. It includes funds for military technicians and civilian personnel services and benefits. It also includes funds for operations, maintenance, repair of facilities by contract, leased property rentals and service agreements. Travel and transportation expenses of full-time military, military technicians, civilian personnel, transportation of material, purchase and rental of data processing equipment and service are also included. Funds are also provided for commercial communications service, maintenance of base equipment, vehicles, medical support, purchase of supplies, equipment and services from Defense Business Operations funds and from commercial sources. It also includes funds for expenses of field training, exercises and maneuvers, training equipment, and supplies.

BUDGET ACTIVITY: OPERATING FORCES

EXHIBIT OP-5

Activity Group: Air Operations

Subactivity Group: Aircraft Operations

I. Description of Operations Financed:

This activity group consists of all ANG flying units to include: strategic bomber aircraft; air defense forces for interception of hostile aircraft attempting to penetrate CONUS airspace; strategic refueling aircraft to extend the radius of operation of air defense and other refuelable aircraft; combat crew training aircraft for transitioning aircrews from one type of aircraft to another weapon system; tactical air forces which provide air-to-air combat, air-to-ground weapons delivery, reconnaissance capability, observation and target acquisition systems, and operational test and evaluation aircraft for ANG and AFR; rescue and recovery operations for retrieving downed aircrew members; strategic, tactical and support airlift forces for transport of personnel and equipment on an inter and intra-theater basis; and special operations forces in support of USSOCOM missions. O&M funding provides the necessary commodities for flying of Air National Guard related aircraft; civilian personnel, including military technicians who carry on the day-to-day training, maintenance, and administration of the Air National Guard; transportation cost for training conducted at deployed locations, and per diem; miscellaneous services and equipment. These are required to provide the day-to-day staffing needed to train, equip, and support an Air National Guard force at a level of combat readiness that enables it to immediately assimilate into the active force and be capable of conducting independent operations in accordance with unit wartime taskings.

II. Force Structure Summary:

This activity contains financing for the following force categories:

- Strategic and conventional bombers consisting of B-1B aircraft.
- F-15 and F-16 interceptor aircraft dedicated to CONUS air defense.
- KC-135 air refueling aircraft for strategic and general purpose refueling operations.
- F-16 combat crew training aircraft to transition aircrews from one aircraft to another.
- Tactical aircraft including, F-15, A-10, F-16, and OA-10 aircraft.
- EC-130E and HC-130 aircraft for SOF mission. (Budgeted for by USSOCOM)
- Rescue and recovery aircraft including HH-60s and HC-130s.
- Strategic airlift consisting of C-141 and C-5 aircraft.
- Tactical airlift comprised of C-130 aircraft
- Support aircraft consisting of C-21 and C-22 aircraft.

10. Functional Program Transfers

a. Transfers in

\$ + 2,000

- (1) Transfer of contractor logistic support items for the Pacer Coin mission from the Aircraft Procurement, Air Force appropriation to the Air National Guard in FY 1998. \$ + 2,000

11. Program Increases

\$ + 105,365

- a. Depot Maintenance (FY 1997 Base, \$ 216,086) Increased maintenance requirements primarily caused by the transition of KC-135 engine repair work into two level maintenance and the deferring of workload from FY 1997 into FY 1998. Two level maintenance was implemented into the Air National Guard beginning in FY 1996. KC-135s were gradually phased into this concept of depot level maintenance with the largest portion scheduled for FY 1998. KC-135 aircraft maintenance funding also increases to finance 2,000 additional hours of depot work required solely because of the aging of these aircraft. This causes the cost of periodic depot maintenance (PDM) to be significantly higher than in FY 1997. FY 1998 aircraft maintenance requirements also increase to support additional PDMs for B-1 (4), and C-5 (1) aircraft scheduled during the fiscal year. The depots have also established a speedline beginning in FY 1998 to replace the 479 bulkhead on all F-16 aircraft. The bulkhead replacement will require all F-16 aircraft to be inducted for maintenance beginning in FY 1998. \$ + 51,066

Activity Group: Air OperationsSubactivity Group: Aircraft OperationsC. Reconciliation: Increases and Decreases:

- b. Increase in FY 1998 attributed to the non-programmatic reduction in FY 1997 to offset the higher than budgeted cost of executing flying hours required to maintain proficiency and readiness of Air National Guard flying units. \$ + 28,303
- c. B-1, Strategic Bomber (FY 1997 Base, \$ 114,555) Continued growth in FY 1998 at the second Air National Guard B-1 bomber unit that was activated the third quarter of FY 1996. This unit will obtain its final four (4) aircraft along with flying hours and civilian workyears during FY 1998.
(+ 22 workyears, + 1,848 flying hours) \$ + 20,699
- d. F-16, Tactical Air (FY 1997 Base, \$ 391,581) Increase in FY 1998 finances logistics equipment and support items required to incorporate a quick response tactical reconnaissance capability into five (5) Air National Guard F-16 tactical fighter units. This capability is unique in the Combat Air Forces (CAF) and is a cost effective Air Force solution to CINC driven RECCE requirements. Additional growth in FY 1998 is caused by the decision to perform maintenance on certain aircraft engines at the unit level rather than at the depots resulting in increased requirements for depot level reparables. \$ + 3,940
- e. F-16, Air Defense (FY 1997 Base, \$ 160,134) Increased requirements in FY 1998 for depot level reparables as certain engines on F-16 fighter aircraft will be repaired at the unit level maintenance shops rather than be maintained under the two level maintenance concept which requires shipment to the depots for repair. FY 1998 also increases slightly to support an increase in technician workyears for F-16 air defense. These increases are partially offset by a reduction in funding for the FAKER contract operation beginning in FY 1998. (+ 5 workyears) \$ + 914

C. Reconciliation: Increases and Decreases:

- f. ANG/AFR Operations Test and Evaluation (FY 1997 Base, \$ 5,673) Flying hour and funding increase in FY 1998 at the Air National Guard/Air Force Reserve Test Center at Tucson to complete the Air Combat Command (ACC) tasked testing for pre-block 40 F-16 aircraft. Increase will support the Air Force commitment to a time-phased aircraft modernization program.
(+ 204 flying hours)

\$ + 443

12. Program Decreases

\$ - 52,815

- a. Depot Maintenance (FY 1997 Base, \$ 91,029) Reduced aircraft and engine maintenance requirements attributed to the realignment of funding to depot level reparables for the repair of F-16 engines that will be maintained at unit level rather than at the depots and decreased contractor logistics support required due to the reduction of C-26 and T-43 operational support airlift assets.

\$ - 26,443

- b. C-130, Tactical Airlift (FY 1997 Base, \$ 371,686) Decrease related to the FY 1998 reduction of four (4) aircraft each at five ANG C-130 locations. These units will be reduced to eight (8) PAA by the end of the fiscal year. FY 1998 PAA reductions are partially offset by the addition of two (2) LC-130H aircraft supporting the National Science Foundation's mission in the Antarctic. These two (2) additional aircraft will be financed on a reimbursable basis by the National Science Foundation beginning in FY 1998.
(- 7 workyears, - 5,427 flying hours)

\$ - 19,401

- c. Operational Support Airlift (FY 1997 Base, \$ 30,157) Annualization of the FY 1997 reduction of eleven (11) C-26 operational support aircraft plus the elimination during FY 1998 of the two (2) T-43 aircraft that support the Air Force Academy's airborne academic laboratory and the remaining C-26 aircraft in the ANG inventory. (- 5 workyears, - 10,206 flying hours)

\$ - 3,549

- d. KC-135, Air Refueling (FY 1997 Base, \$ 441,265) Civilian personnel and workyear reduction at Air National Guard KC-135 air refueling locations.

\$ - 1,614

13. FY 1998 Budget Request

\$ 2,243,510

14. Price Growth

\$ - 37,315

15. Functional Program Transfers

\$ + 2,841

a. Transfers In

\$ + 2,841

- (1) Realignment of funding from the active Air Force to support the transfer of training range responsibilities to the Air National Guard. ANG full-time personnel will manage and operate the Electronic Combat portion of this range.

\$ + 2,841

16. Program Increases

\$ + 29,651

- a. Depot Maintenance (FY 1998 Base, \$ 259,782) FY 1999 depot maintenance funding increases are attributed to the continuation of the 479 bulkhead replacement on ANG F-16 aircraft, one more C-5 PDM scheduled during the fiscal year, and the addition of 1,160 hours of depot workload on KC-135 aircraft. The increased hours of KC-135 work in FY 1999 are over and above those scheduled for FY 1998.
- b. Growth in FY 1999 supplies and equipment funding to support the purchase of items required to modernize and upgrade aging and inoperable computer systems and to replenish depleted stocks at various ANG units. Increase is created by the deferral of procurement from FY 1998 due to the lack of sufficient resources caused primarily by significant price increases planned for that fiscal year.

\$ + 19,342

\$ + 7,298

Activity Group: Air OperationsSubactivity Group: Aircraft OperationsC. Reconciliation: Increases and Decreases:

- c. Airlift Defensive Systems (FY 1998 Base, \$ 0) FY 1999 increase in supply and equipment funds to support airlift defensive systems on ANG rescue, tactical airlift, and strategic airlift weapon systems. These systems were procured by the active Air Force for the Air National Guard during FY 1998.
- \$ + 2,096
- d. C-130, Tactical Airlift (FY 1998 Base, \$ 377,951) Increase related to the first quarter FY 1999 change of two (2) C-130H aircraft previously designated to perform the Pacer Coin mission to C-130H tactical airlift. Growth also supports the series change of four (4) C-130Es to C-130J aircraft during FY 1999. These increases are partially offset by the full year impact of civilian manpower reductions in FY 1998 caused by the loss of four (4) aircraft each at five (5) ANG C-130 locations.
- \$ + 915
- (- 101 workyears, + 577 flying hours)

17. Program Decreases

\$ - 29,665

- a. Depot Maintenance (FY 1998 Base, \$ 127,932) Reduced requirements for depot level maintenance is attributed to a decrease of three (3) PDMs on the B-1 aircraft and four (4) PDMs for the C-130Es. Funding is also reduced as the replacement of the center wing box on the C-141 will be completed in FY 1998.
- \$ - 18,190
- b. Pacer Coin, ANG (FY 1998 Base, \$ 13,103) FY 1999 reduction based on the elimination of the Pacer Coin mission. This mission was transferred from the active Air Force to the ANG in FY 1995 and prior to its cancellation has been accomplished using two (2) Guard C-130 aircraft. These aircraft will be converted to a C-130 tactical airlift role beginning in FY 1999.
- \$ - 9,992
- (- 28 workyears, - 1,500 flying hours)
- c. B-1, Strategic Bomber (FY 1998 Base, \$ 148,718) Decrease in leased space requirements at the second ANG B-1 bomber unit. This unit converted to B-1 aircraft the third quarter of FY 1996 and required the lease of several trailers until adequate facilities were erected. Rental is required for three years and will expire the end of FY 1998. (- 4 workyears)
- \$ - 1,483

Subactivity Group: Mission Support Operations

I. Description of Operations Financed:

This activity includes fuels for mission support operations; civilian personnel, including military technicians who carry on the day-to-day training, maintenance, and administration of the Air National Guard; transportation cost for training conducted at deployed locations; per diem; communications; miscellaneous services and equipment; and medical support and supplies. These are required to provide the facilities, equipment, and day-to-day staffing needed to train, equip, and support an Air National Guard force at a level of combat readiness that enables it to immediately assimilate into the active force and be capable of conducting independent operations in accordance with unit wartime tasking. This estimate provides funds for military technicians and civilian personnel services and benefits, travel and transportation expenses of full-time military, military technicians, and processing equipment and service, power equipment for communications units, and commercial communications service. Resources for maintenance of base equipment including vehicles, medical support, purchase of supplies, equipment and services from the Revolving funds and from commercial sources are also included. It also includes funds for expenses of field training, exercises and maneuvers, training equipment, and supplies.

II. Force Structure Summary:

This activity contains financing for the following mission support units and activities:

- 1st Air Force Mission
- Tactical Control Units
- Combat Communications Units
- Air Traffic Control
- Weather Service Units
- Aerial Port Units
- Medical Readiness Units
- Aeromedical Evacuation Units
- Civil Engineering Units
- Air National Guard Readiness Center

I. Description of Operations Financed:

This activity includes normal support at all 175 Air National Guard locations, as well as host/base operating location activities at Buckley, Otis, Selfridge, Portland, and Griffiss. This activity also includes base communications requirements, and funding for environmental compliance, conservation, and pollution prevention.

II. Force Structure Summary:

This estimate provides the funding associated with manpower (Title V) authorizations and associated costs for base operation support for Buckley, Otis, Selfridge, Portland, and Griffiss locations, as well as, the ANG units at Forbes, Duluth and Kingsley for BOS activities, including these functional areas: administration, public affairs, safety, information management, contracting, comptroller, transient aircraft maintenance, base operations, supply, transportation, vehicle maintenance, security police, social actions, billeting, and the Air National Guard bands. Also, this activity finances Facility Operation and Maintenance Agreements (FOMA) which includes cost sharing with the States for utilities, service contracts, leases, airport joint use agreements, crash/fire/rescue services, custodial, refuse collection and disposal services, installation engineering services and other real property support (RPS), and security guard agreements which include physical security and services for Government owned facilities, equipment, and materiel at ANG installations.

C. Reconciliation: Increases and Decreases:

- a. Real Property Maintenance (FY 1998 Base, \$ 77,879) Increased funding to support preservation maintenance requirements. The Air National Guard has historically been significantly underfunded in this area. The Air Force reevaluated preservation maintenance requirements Air Force-wide and provided additional funding which fully finances the ANG preservation maintenance program. This increase will bring ANG preservation maintenance resources to a level that is consistent with all other Air Force commands.

BUDGET ACTIVITY: OPERATING FORCES

EXHIBIT OP-5

Activity Group: Air Operations

Subactivity Group: Depot Maintenance

I. Description of Operations Financed:

Provides funds for depot level maintenance and repair performed on aircraft, engines, vehicles, and other major items of equipment. Includes all work associated with repair, overhaul, corrosion control, reclamation, assembly and disassembly, inspection testing, sustaining engineering, contractor furnished supplies and equipment, and Government Furnished Materials (GFM) procured from revolving funds in support of the Air National Guard. This activity includes funds from which the Air National Guard reimburses the Air Force Materiel Command (AFMC) for depot level maintenance on aircraft and other equipment. Depot maintenance is required to repair, overhaul and upgrade Air National Guard weapons systems to enable the Air National Guard to be capable of conducting independent operations in accordance with wartime tasks. This estimate provides funds for depot maintenance, including corrective maintenance of aircraft, equipment and accessories, electronic and communications equipment, vehicles, and other equipment. Depot level maintenance includes repair, overhaul, reclamation, manufacture, assembly and disassembly, inspection, testing, and service engineering including contractor-furnished supplies and equipment incident to maintenance service performed under contract. It also includes Government Furnished Materials (GFM) procured from Air Force Revolving Funds and consumed by the depots in support of the Air National Guard. Beginning in FY 1995 funding for aircraft and engine maintenance, and sustaining engineering have been transferred from the depot maintenance subactivity group to the aircraft operations subactivity to properly reflect total weapon system costs in one activity.

II. Force Structure Summary:

Depot maintenance funds will provide for the maintenance and repair of non-flying Air National Guard assets that will include electronic and communications equipment, vehicles, and other equipment items.

I. Description of Operations Financed:

This activity supports Air National Guard efforts throughout the United States to recruit and retain quality enlisted and officer personnel into the ANG. It provides those essential resources to accomplish the recruiting mission and provides local, regional, and national advertising designed to increase public awareness and generate recruiting opportunities. Provides funds for reimbursement of expenses (out of pocket) incurred in the performance of recruiting duties, reimbursement of travel and transportation expenses incurred for official travel performed for recruiting purposes and civilian personnel costs associated with administration of the program. Also included are resources for local, regional, and national advertising to support the procurement and retention of quality personnel into the Air National Guard.

6. Program Increases	\$ + 1,185

a. Recruiting and Advertising (FY 1997 Base, \$ 4,864) Partial year increase in recruiting and advertising funding to enhance the Guard's ability to attract and retain new recruits from a dwindling pool of eligible personnel while competing with educational institutions, potential employers, or other Reserve components whose advertising resources are significantly larger. Historical underfunding of this account has severely hampered the ANG's ability to fill critical skills vacancies, replace those personnel who have retired, and to achieve end strength objectives insuring Total Force readiness levels.

C. Reconciliation: Increases and Decreases

- a. Recruiting and Advertising (FY 1998 Base, \$ 6,199) Full year impact of FY 1998 adjustment to alleviate historical shortfall in Air National Guard recruiting and advertising funding. Increase will support the attainment of end strength goals and enhance the ANG's ability to fill critical skills vacancies.
